

Instructions for TAG set up

This is manual for users about placing TAG sticker on vehicle windshield.

IMPORTANT INFORMATION:

- TAG sticker shouldn't interfere with driver!
- Removing TAG will cause damage on sticker!

INSTALATION

Picture 1

Picture 2

1) Finding best position for TAG sticker

- TAG sticker is always installed inward, printed side facing outside (picture 2)
- Before installing TAG, user should choose position on windshield (picture 1)
- If windshield is equipped with thermal insulation foil, then TAG should be installed on position 1. If you have any doubts, contact car manufacturer or servicer.
- If vehicle is equipped with windshield heater, position 2 should be used for TAG. Good TAG position is zone 3, for vehicles without windshield foils and heaters.

2) TAG sticker installation

- Chosen position for TAG sticker must be clean.
- TAG sticker should be positioned at least 2 cm from windshield edge.
- Remove protective foil from TAG.
- Place TAG on chosen position and hold it firmly on marked line for optimal grip.
